Part Four · The High Orchard 53
Expert · 10×10 · Puzzles 81–100

Solutions 75

After the deepest snow in years, the timber fences around Frostwood have vanished under the drifts: the village garden lots, the lodge meadow paddocks, the mill-yard plots and the high orchard terraces. Only the tops of the posts still show, and on some of them the lot-keeper has hung a little number. 100 maps are left. Every puzzle has exactly one solution, and every one can be solved by logic alone, with no guessing.

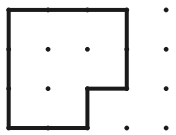

Before You Walk the Bounds

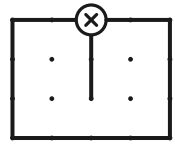

How to Play

Each puzzle is a map of fence **posts**, the dots, with some squares holding a number. Draw **one fence** along the dotted lines so that:

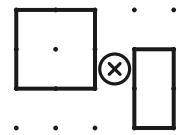

- The fence runs from post to post, **across or down**, never diagonally.
- It is **one closed loop**: no loose ends, no branches, and it never crosses or touches itself. Every post has either no fence or exactly two fence ends.
- Each **number** says how many of the four sides of its square are fence. Squares without a number may have any number of fence sides.
- There is only **one** fence. Two separate loops are not allowed.

One closed fence: yes

Branching: no

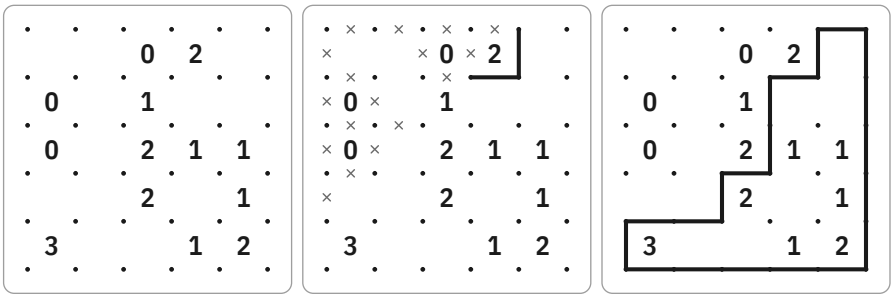

Two fences: no

Useful Tricks

- **Mark what you know.** Put a small × on every edge that cannot be fence. A **0** gets four of them straight away.
- **Count the ends.** A post with one fence end and one open edge must carry on along it. A post with only one open edge left cannot use it.
- **Corners.** A **3** in a corner of the map always uses both sides that meet at the corner post; a **1** in a corner never does.
- **Side-by-side 3s.** When two 3s touch, the edge between them is fence, and so are the two outer edges parallel to it.
- **Don't close early.** Never join the two ends of a piece of fence unless that finishes the whole puzzle.
- **What if?** From Part Two on, pencil in one edge and follow it until something breaks, then rub it out and cross that edge.

Let's Mend a Fence

A Worked Example

The puzzle *After step 3* *Solved*

This little 5×5 map has thirteen numbers. Draw fence edges as firm lines and mark the edges you rule out with a small ×.

1. Start with the **0**s. No fence touches a 0, so put a small × on all four of its sides.
2. Every post has either no fence or exactly two fence ends. Down the left edge, and either side of the top **0**, some posts now have only one open edge left. A single fence end is not allowed, so those edges get an × too. The top-left corner goes the same way.
3. Now the **2** in the top row: its left side touches the 0 and its top side has just been crossed, so its bottom and right sides must both be fence. (This is the middle picture.)
4. Follow the fence. From the 2's top-right corner it can only turn right along the top edge and run down the right side of the map. From its bottom-left corner it can only go down, past the **1** beside it. That 1 now has its one fence, so cross its other sides.
5. The middle **2** has its top and left sides ruled out, so its bottom and right sides are fence. The **1** to its right is touched on its left by that fence: cross its other three sides.
6. Down the right side and along the bottom row, each number is settled by its neighbours, and the fence runs all the way along the bottom to the **3** in the corner. The 3 takes its bottom, left and top sides, and the fence runs back up the left side of the lower 2 to join the piece you started with. One closed fence, and every number counts its fenced sides.

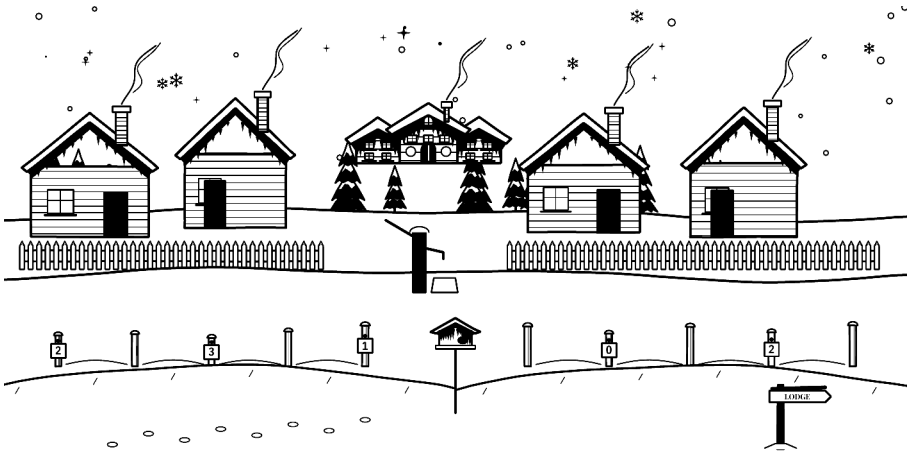

Solutions are at the back of the book.

Part One · Easy · 6×6

The Village Lots

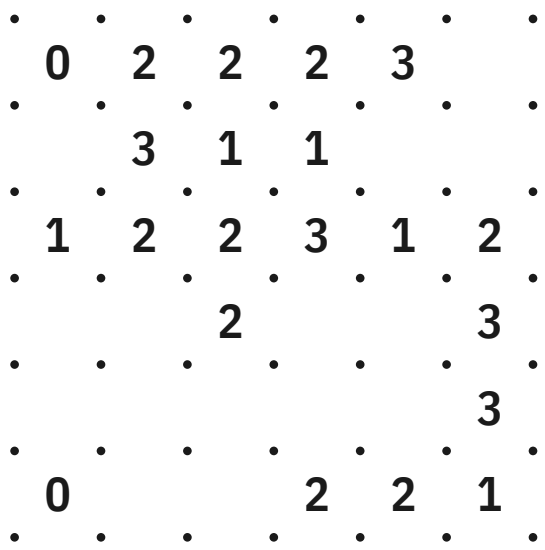

Puzzles 1 to 20

Six-by-six garden lots behind the cottages. Every number can be worked out by counting alone: start with the 0s, the corners and the numbers on the edge of the map, and follow the fence from post to post.

Part Two · Medium · 7×7

The Lodge Meadow

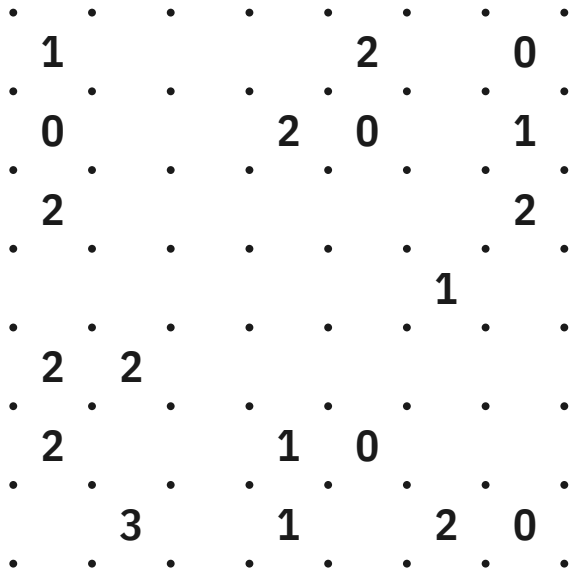

Puzzles 21 to 50

Seven-by-seven paddocks below the lodge. Counting still does most of the work, but now and then you will need a quick "what if?": pencil in one edge and watch it break a rule within a few moves.

THANK YOU FOR WALKING THE BOUNDS

Fences of Frostwood

If you enjoyed mending the fences of Frostwood, a short review helps other puzzlers find the book. The lot-keepers read every one, usually with a mug of cocoa after the last post is found.

ALSO BY BLAKE LA PIERRE

A Frostwood Puzzle Book

The Thief Stayed the Night
A snowbound hotel mystery puzzle book. Twelve cozy elimination cases at the Frostwood Lodge.

Frostwood Express
200 Train Tracks logic puzzles. Lay the railway that climbs from the valley to the lodge.
