Cozy Codewords for Quiet Hours

Curl up on the window seat, listen to the rain and crack the code.

A codeword is a crossword with no clues. Every square holds a number, every number is a secret letter, and all 26 letters of the alphabet are hiding in each grid. Start from a few starter letters, spot a pattern, and watch the words fall into place.

Every answer is an everyday word in American spelling: no names, no abbreviations, nothing gloomy. And every puzzle was checked by computer against a 172,823-word dictionary to have exactly one solution.
