

FROSTWOOD EXPRESS

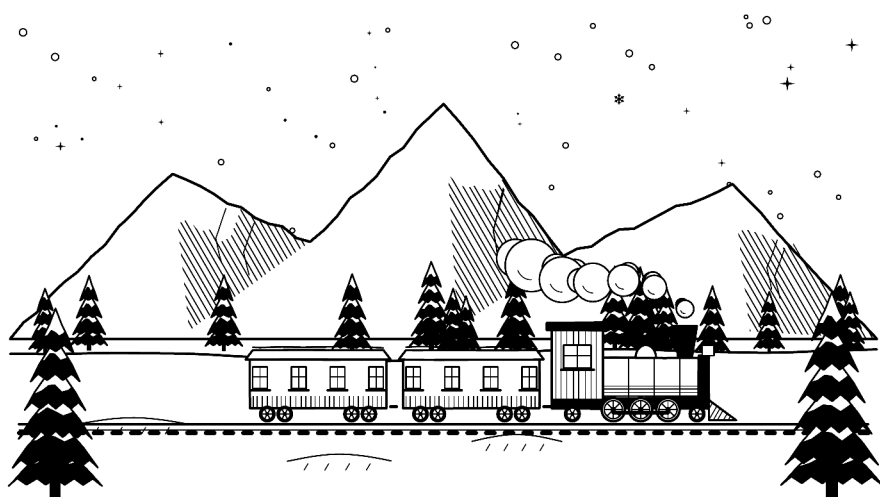

The Frostwood Express crosses the Silverbrook Viaduct

A SNOWY MOUNTAIN RAILWAY PUZZLE BOOK

FROSTWOOD EXPRESS

*200 Train Tracks logic puzzles
from the foothills to the summit*

A FROSTWOOD PUZZLE BOOK

Blake La Pierre

Frostwood Express: 200 Train Tracks Logic Puzzles

Copyright © 2026 Blake La Pierre. All rights reserved.

No part of this book may be reproduced in any form without written permission from the author, except for brief quotations in reviews. Readers are welcome to photocopy puzzle pages for their own personal use while solving.

The Frostwood Express, its line and its stations are imaginary. Any resemblance to real railways is coincidental.

First edition, 2026

Set in Crimson Text, Playfair Display SC and IBM Plex Sans Condensed, used under the SIL Open Font License.

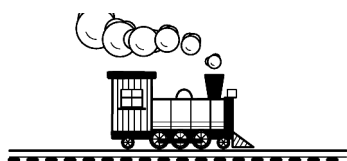

FROSTWOOD EXPRESS

CONTENTS

How to Play	7
A Worked Example	8
Part One · The Foothills Line	9
Easy · 6×6 · Puzzles 1–50	
Part Two · The Silverbrook Viaduct	35
Medium · 8×8 · Puzzles 51–100	
Part Three · Frostwood Pass	61
Hard · 10×10 · Puzzles 101–150	
Part Four · The Summit Run	113
Expert · 12×12 · Puzzles 151–200	
Solutions	165

All aboard. The Frostwood Express climbs from the valley to the old lodge on the mountain, and the snow has buried the timetable, the signals and most of the track. Two hundred stretches of line need re-laying before the next train can run. Every puzzle has exactly one solution, and every one can be solved by logic alone, with no guessing.

BEFORE YOU BOARD

HOW TO PLAY

Each puzzle is a map of a stretch of line, drawn as a grid of squares. Your job is to lay **one continuous railway track** through the grid, square by square, following these rules:

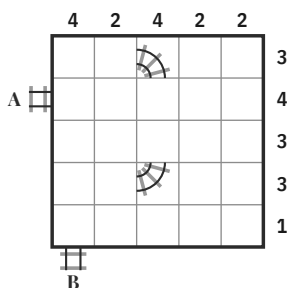

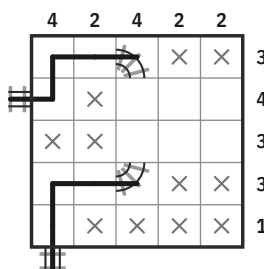

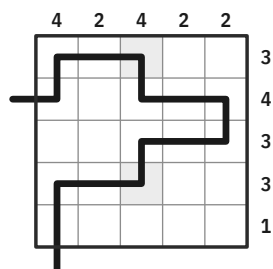

- * The track enters the grid at **A**, on the left edge, and leaves it at **B**, on the bottom edge.
- * Every square is either **track** or **empty**. A track square holds a straight piece or a curve: it joins exactly two of its four sides. The track never branches, never crosses itself and never forms a closed loop.
- * The number above each column and beside each row tells you **how many squares** in that column or row contain track.
- * Some pieces of track are already laid for you. They are part of the answer, exactly as drawn.
- * Track squares may sit side by side without being joined. Only the pieces you draw connect them.

Useful Tricks

- * **Full and finished lines.** When a row or column already has as many track squares as its number, mark every other square in it with a small $\times$. When it has only just enough undecided squares left, they must all be track.
- * **Dead ends.** A track square needs two exits. If a square can reach only one neighbour that is not ruled out, it cannot be track.
- * **No loops, no shortcuts.** Never join two ends of the same piece of track. And don't join the piece that starts at A to the piece that ends at B until every row and column total is met.
- * **The crossing rule.** Draw an imaginary line between two neighbouring columns. The track starts on the left of it at A. If B is on the right, the track must cross that line an *odd* number of times; if B is on the left, an *even* number. The same works between two rows: the crossings are odd if A is above the line and even if A is below it. When all the crossings but one are known, the last one is decided.
- * **What if?** In the Expert puzzles, you may have to suppose a square is track, follow the consequences, and see the rules break. Then you know that square is empty.

LET'S LAY SOME TRACK

A WORKED EXAMPLE

*The puzzle**Halfway there**Solved*

Rows are numbered from the top and columns from the left. Here is one way to solve it:

- 1. Row 5 (the bottom row) needs 1 square.** The square above B is track, because the track leaves the grid there, so the other four squares of row 5 are empty. That square can only continue upward, into row 4.
- 2. The curve in row 4** joins the square to its left and the square above it, so row 4 already has three track squares: its first three. The last two squares of row 4 are empty.
- 3. Column 2 needs 2.** The curve at the top points left, into column 2, and the track in row 4 is in column 2 too. That makes two, so the middle squares of column 2 are empty. The track in row 4 therefore runs straight across to column 1 and turns down to B.
- 4. Column 1 needs 4.** A, row 4 and row 5 are three. The fourth is either row 1 or row 3. Row 3 would be a dead end (its only open neighbour is A), so it is empty, and row 1 is track: A turns up, then right into the top curve. Row 1 now has its 3, so its last two squares are empty. That is the middle picture.
- 5. Finish.** Column 3 needs all four of its top squares. Joining the two loose ends straight down the middle of column 3 would link A to B far too early, so both turn right instead. Column 4 has its 2, row 2 needs one more square at the far right, and the last three pieces fall into place.

Solutions are at the back of the book, with every pre-laid piece shaded.

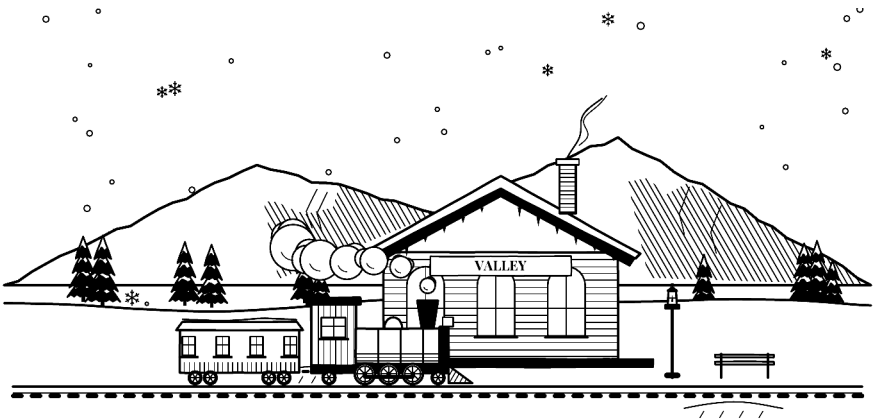

PART ONE · EASY · 6×6

THE FOOTHILLS LINE

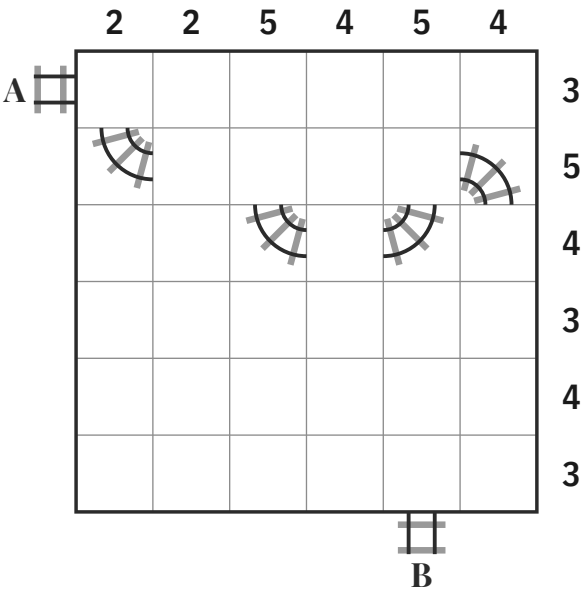

Puzzles 1 to 50

*Six-by-six grids to warm up on. The counts and the given pieces do most of the work;
look for full rows, empty rows and dead ends.*

THANK YOU FOR RIDING

THE FROSTWOOD EXPRESS

If you enjoyed laying track through the snow, a short review helps other puzzlers find the book. The conductor reads every one, usually over a cup of cocoa in the summit waiting room.

ALSO BY BLAKE LA PIERRE

The Thief Stayed the Night

A snowbound hotel mystery puzzle book. Twelve cozy elimination cases at the Frostwood Lodge, at the top of the line.
