Pull a chair close to the fire. Each puzzle is a famous (or fireside) saying written in a secret alphabet: every letter has been swapped for another, the same way all the way through. Word lengths and punctuation stay the same. Your job is to bring the words back. Every puzzle has exactly one solution, checked by computer.

BEFORE YOU BEGIN

HOW TO PLAY

A **cryptogram** (or **cryptoquote**) is a message written in a **monoalphabetic substitution cipher**. One plain letter always becomes the same cipher letter, and no two plain letters share a cipher letter.

- Punctuation and word lengths are unchanged. An apostrophe or period can be a useful foothold.
- A one-letter word in English is almost always **A** or **I**.
- Look for common short words: **THE, AND, TO, OF, IN, IS, YOU**.
- Repeated letter patterns help: a three-letter word with the pattern X Y X is often **EYE** or similar; double letters (as in XX) often stand for **LL, EE, SS** or **OO**.
- English letter frequency is a quiet guide: **E, T, A, O, I, N** are common.
- Some puzzles print **starter letters** (for example **Q = T**). Fill those in first and pencil them above the alphabet strip in your mind.
- Write lightly. When a letter is certain, pencil it every place that cipher letter appears.
- The author's name beside each puzzle is printed in ordinary English and is **not** encrypted.

LET'S WARM UP

A WORKED EXAMPLE

Here is a complete Easy puzzle with three starter letters. Try it before peeking at the solution on the next page.

EXAMPLE

```

U J G   N C W V   H J S V L   J W V L   U J G L
_ _ _ _ _

Q X A I   A J B   J G B F X I V   V W V A B F
_ _ _ _ _

L V C E X Y V   B N X F   C A I   U J G   S X E E
_ _ _ _ _

M X A I   F B L V A O B N .
_ _ _ _ _

```

— *Marcus Aurelius*

Starter letters: M = F Q = M S = W

One path to the answer

1. Pencil in the starter letters first: **M = F**, **Q = M**, **S = W**.
2. Hunt for one-letter words and the pattern of **THE** (the most common three-letter word).
3. Each time you place a letter, write it above every matching cipher letter on the page.
4. When the sentence reads as natural English and every cipher letter has a partner, you are done.
5. The plaintext of this example is: *You have power over your mind not outside events realize this and you will find strength.* — Marcus Aurelius.

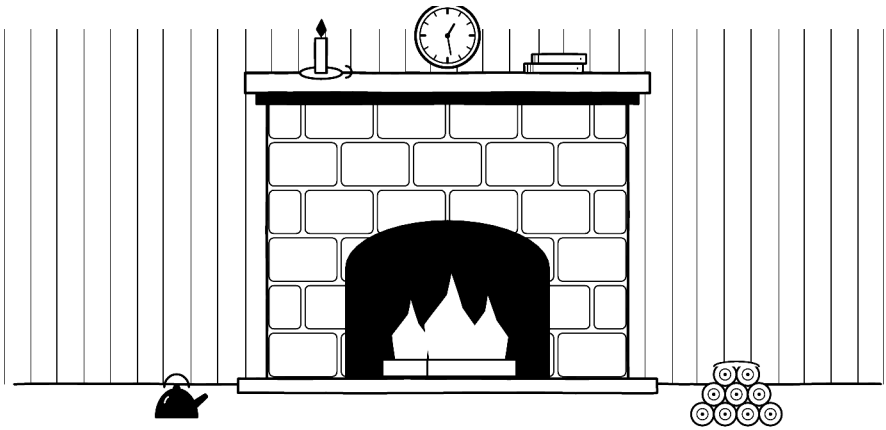

Hints (first letters of each word) and full solutions are at the back of the book.
