Hard · 10×10 · Puzzles 81–120

Part Four · The High Meadows 95
Expert · 12×12 · Puzzles 121–160

Solutions 137

After the deepest snowfall of the winter, Frostwood wakes up snowed in. The lodge keepers and the villagers take up their shovels and dig one long path that links every corner, leaving neat patches of untouched snow in between, each marked with a little numbered stake. 160 maps of the digging are left, showing only the stakes. Every puzzle has exactly one solution, and every one can be solved by logic alone, with no guessing.

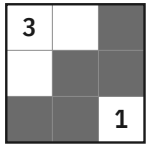

Before You Dig

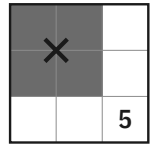

How to Play

Each puzzle is a snowed-in map. **Shade** squares to dig the path, and leave the others as **snow**, so that:

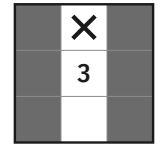

- Every number sits in a **snow patch of exactly that many squares** (its own square counts).
- Each snow patch holds **exactly one number**. Two patches may touch at a corner, never side by side.
- All the shaded squares join up into **one path**: you can walk from any path square to any other, moving across or down.
- The path never makes a **2×2 block** anywhere on the map.
- Numbered squares are always snow. Shade the path, and mark squares you know are snow with a dot.

A finished map: yes

A 2×2 of path: no

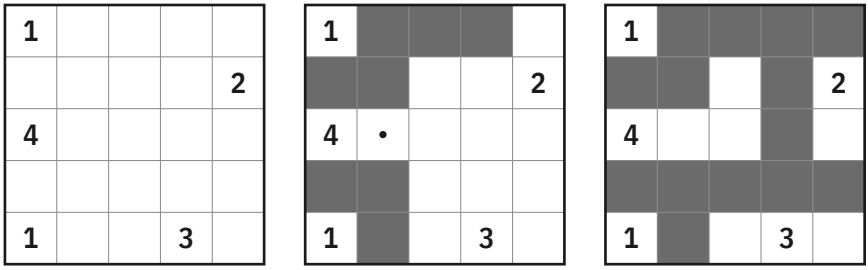

Path in two pieces: no

Useful Tricks

- **Finished patches.** A **1** is finished on its own. Shade every square beside a finished patch.
- **Between two numbers.** A square touching two different patches must be path, or the patches would join.
- **Out of reach.** A square that no number can reach with the squares it has left is path.
- **One way out.** A patch that still needs squares, or a piece of path cut off from the rest, with only one open square beside it, must grow into that square.
- **No 2×2.** If three squares of a 2×2 block are path, the fourth is snow.
- **List the ways.** From Part Two on, a small patch often has only a few ways to finish. Squares in all of them are snow; squares beside all of them are path.
- **What if?** From Part Three on, shade a square in pencil and follow it until something breaks, then rub it out: that square is snow.

Let's Dig a Path

A Worked Example

The puzzle *After step 4* *Solved*

This little 5×5 map has five numbers. Rows count from the top and columns from the left.

1. Each **1** is a finished patch on its own, so shade the squares beside them: right of and below the top **1**, above and right of the bottom **1**.
2. The third and fourth squares of the top row are out of reach. The **4** can add only three more squares and the **2** only one, and neither could get that far. Shade them.
3. The **4** now has path above and below it, so it must grow to the right: mark the square beside it as snow with a dot.
4. The shaded square under the top **1** is boxed in on three sides, and the path must stay in one piece, so the square to its right is path. The same goes for the square above the bottom **1**. (This is the middle picture.)
5. At the top, three squares of a 2×2 block are now path, so row 2, column 3 is snow. The square to its right is path (the **2** would get too big), so that snow must join the **4** through the square below it. The **4** is finished: shade around it.
6. At the bottom left, three squares of a 2×2 block are path, so the square left of the **3** is snow and part of the **3**.
7. Row 4, column 5 is out of reach, so shade it. The long run of path in row 4 can only get out through column 4, so shade that too. Now a 2×2 on the right has three path squares, so row 3, column 5 is snow: the **2** is finished, the top-right corner is path, and the last square completes the **3**.

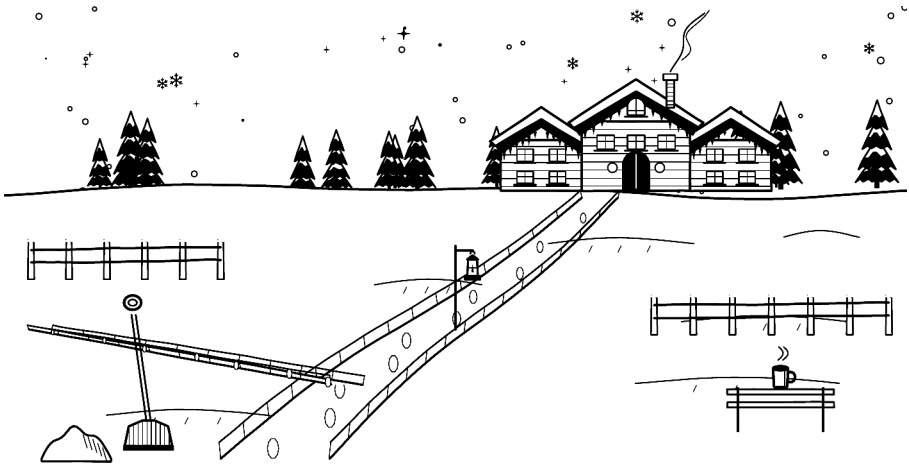

Every patch now has its number of squares, the path is one piece, and there is no 2×2 of path anywhere. Solutions are at the back of the book.

Part One · Easy · 7×7

The Lodge Garden

Puzzles 1 to 40

Seven-by-seven corners of the lodge garden. Start with the 1s and the squares squeezed between two numbers, and the path will soon show you where it wants to go.

THANK YOU FOR DIGGING IN

SNOW PATHS OF FROSTWOOD

If you enjoyed digging the paths of Frostwood, a short review helps other puzzlers find the book. The path-diggers read every one, usually with a mug of cocoa once the shovels are back in the shed.
