Part Four · The High Meadows 95
Expert · 8×8 · Puzzles 121–160

Solutions 137

On the coldest nights of the winter, icicles grow along every eave in Frostwood: on the lodge porch, the cottages, the station canopy and the frozen falls. The village children like to sort them, so that every row and every column holds one icicle of each length, and they leave little signs between them to show which is the longer. 160 of their grids are left, with only a few lengths and signs filled in. Every puzzle has exactly one solution, and every one can be solved by logic alone, with no guessing.

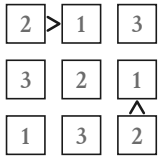

Before You Begin

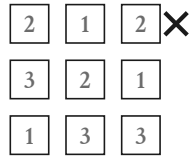

How to Play

Each puzzle is a square grid of icicles. A grid of 5 squares across holds lengths **1** to **5**, a grid of 6 holds **1** to **6**, and so on. Write a number in every square so that:

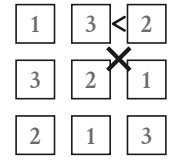

- Every **row** holds each number exactly once.
- Every **column** holds each number exactly once.
- Every **sign** between two squares is obeyed. The point of the sign always faces the **smaller** number: in 2 < 3 the point faces the 2, and a sign pointing up means the upper square is smaller.
- Numbers already printed in the grid are fixed. Write small pencil notes in a corner of a square for the numbers it could still be.

A finished grid: yes

Two 2s in a row: no

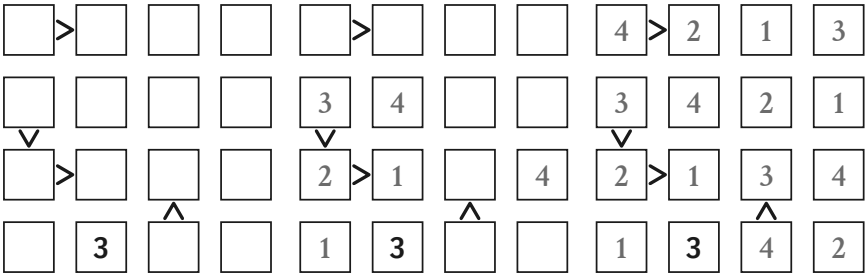

3 smaller than 2? No

Useful Tricks

- **Only one place.** If a number can go in just one square of a row or column, it goes there.
- **Only one number.** If a square has just one number left that fits, write it in.
- **Ends of the signs.** The smaller side of a sign can never be the largest number, and the bigger side can never be **1**.
- **Chains.** In a chain of signs like a < b < c, every step adds at least one, so the top of a three-square chain is at least **3**.
- **Pairs.** From Part Two on, if two squares in a row can only be the same two numbers, those numbers can't go anywhere else in that row.
- **What if?** From Part Three on, pencil in a number and follow it until something breaks, then rub it out: that square can't be that number.

Let's Hang Some Icicles

A Worked Example

The puzzle *After step 4* *Solved*

This little 4×4 grid uses the lengths 1 to 4. It has one given (the **3** in row 4, column 2) and four signs. Rows count from the top and columns from the left.

1. Start with the chain in rows 2 and 3: row 3, column 2 is smaller than row 3, column 1, which is smaller than row 2, column 1. Three different lengths in a chain, so row 2, column 1 is at least **3**, row 3, column 1 is **2** or **3**, and row 3, column 2 is at most **2**.
2. Row 3 needs a **4**. It can't go in its first two squares (they are too small), and row 3, column 3 is smaller than the square below it, so it can't be **4** either. The **4** goes in row 3, column 4.
3. Column 1 needs a **1**. Row 1, column 1 is bigger than its neighbour, and rows 2 and 3 are at least **3** and **2**, so the **1** goes at the bottom, in row 4.
4. Column 2 needs a **4**. Row 1 is smaller than its neighbour, row 3 is at most **2** and row 4 is the given **3**, so row 2, column 2 is **4**. Now row 2, column 1 must be **3**, which leaves **2** for row 3, column 1 and **1** for row 3, column 2. (This is the middle picture.)
5. Column 1 is missing only **4**, at the top. Row 4 still needs **2** and **4**; column 4 already has a **4**, so row 4, column 4 is **2** and row 4, column 3 is **4**. Column 2's last square, row 1, is **2**, and row 3's last square is **3** (and 3 is smaller than the 4 below it).
6. Row 2 still needs **1** and **2**. Column 4 already has a **2**, so row 2, column 4 is **1** and row 2, column 3 is **2**. Row 1 finishes with **1** in column 3 and **3** in column 4.

Every row and column now holds 1 to 4 once, and every sign is obeyed. Solutions are at the back of the book.

Part One · Easy · 5×5

The Lodge Eaves

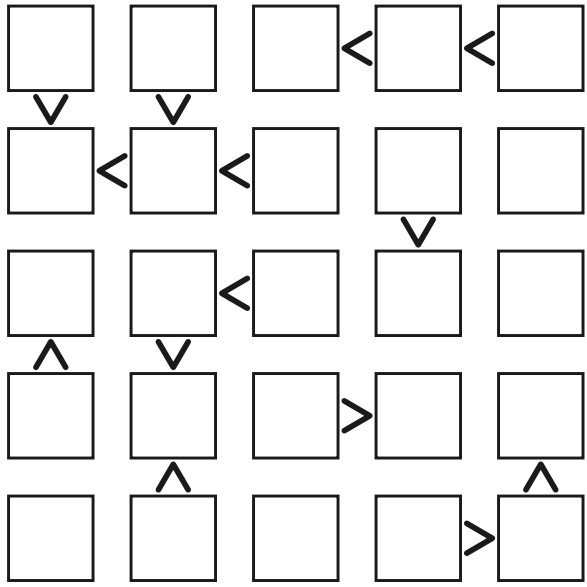

Puzzles 1 to 40

Five-by-five rows of icicles along the lodge eaves. Follow the signs from the smallest icicle up, and every row and column soon falls into place.

Thank You for Puzzling

The Icicles of Frostwood

If you enjoyed sorting the icicles of Frostwood, a short review helps other puzzlers find the book. The icicle keepers read every one, usually with a mug of cocoa once the porch lamps are lit.
