Count the Chimneys

On the coldest night of the winter every fire in Frostwood is lit, and the chimney sweep walks the rounds with a notebook. At the end of each lane a little sign says how many chimneys you can see from there.

100 maps of rooftops are waiting, from the village lanes to the mountain hamlet. Each one is a Skyscrapers puzzle: fill every square with a chimney height so that each row and column holds every height once, and every sign counts the chimneys you can see, with taller ones hiding shorter ones behind them.

Every puzzle has exactly one solution, checked by computer, and every one can be solved by logic alone.

- 100 Skyscrapers puzzles in four parts, from 5×5 to 7×7
- 20 Easy, 30 Medium, 30 Hard and 20 Expert
- Large, clear grids with room to pencil in
- How-to-play guide with a fully worked example
- Complete solutions at the back
- Book eleven of the cozy Frostwood Puzzle Books, in hardcover

Puzzle No. 2

Every height once in each lane. Each sign counts the chimneys you can see.
