Part Four · The Mountain Hamlet 53
Expert · 6×6 · Puzzles 81–100

Solutions 75

On a still winter evening every fire in Frostwood is lit, and every chimney sends up its curl of smoke: along the village lanes, over the lodge roofs, in the station yard and up in the mountain hamlet. Before the next big snow, the sweep walks the rounds and notes, at the end of each lane, how many chimneys can be seen from there. Those notes are all that is left of 100 rooftop maps. Every puzzle has exactly one solution, and every one can be solved by logic alone, with no guessing.

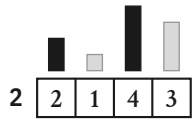

Before You Walk the Rounds

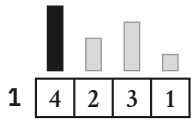

How to Play

Each puzzle is a square map of rooftops. Every square holds one **chimney**, with a height from 1 up to the size of the grid. Write a height in every square so that:

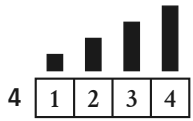

- Each **row** and each **column** (a **lane**) has every height exactly once, like a Sudoku.
- A **number outside the grid** says how many chimneys you can see looking along that lane from that end.
- A taller chimney **hides** every shorter one behind it, so you see a chimney only if it is taller than all the ones in front of it.
- Lanes without a number may show any count. Every puzzle has exactly one answer.

2: the 2 and the 4 are seen

1: the tallest is first

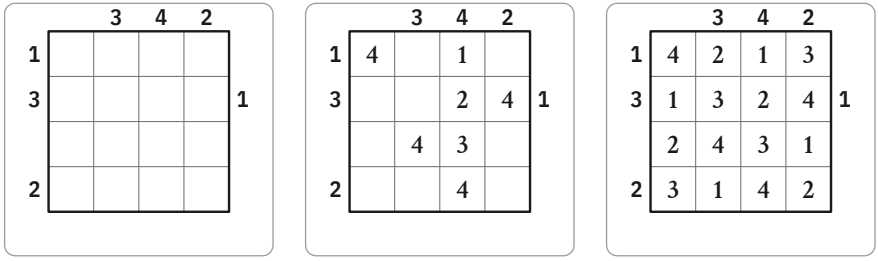

4: they climb 1, 2, 3, 4

Useful Tricks

- **A 1.** Only one chimney is seen, so the tallest stands right beside the clue.
- **The biggest clue.** When the clue equals the grid size, every chimney is seen: the lane climbs 1, 2, 3 and so on, all the way up.
- **The edge rule.** Next to a clue of k in a grid of size n, a chimney is at most $n - k + 1$ tall, and that limit grows by one for each square further in. A clue of 3 in a 5×5 grid means at most 3, then 4, then 5.
- **One of each.** When a height has only one possible square left in a lane, it goes there. Pencil small candidate heights in the corners of squares.
- **Whole lanes.** From Part Two on, list the ways a lane can be filled that fit its clues and the heights already placed, and keep only what they all agree on.
- **What if?** In Part Four, pencil in one height and follow it until a clue or a lane breaks, then rub it out: that height is wrong.

Let's Walk One Map

A Worked Example

The puzzle *After step 3* *Solved*

This little 4×4 map has 7 clues and uses the heights 1 to 4. Work in pencil.

1. Start with the **1**s. Seeing only one chimney means the tallest, the 4, stands right beside the clue. So the top row starts with a 4, and the second row ends with one.
2. Now the **4** above the third column. Seeing all four chimneys means they must climb 1, 2, 3, 4 going down. Fill that column in.
3. Every row has exactly one 4. Rows one, two and four already have theirs, in the first, fourth and third columns, so the third row's 4 must go in the second column. (This is the middle picture.)
4. Look down the second column from its **3**. The 4 is third, so both chimneys above it must be seen: the top one is shorter than the one below it. The top row can only use a 2 or a 3 there, so it takes the 2, the second row takes the 3, and the bottom gets the 1. The top row's last square is then a 3.
5. The second row is missing only a 1, at its start, and its clue **3** checks out: you see the 1, the 3 and the 4.
6. The third row needs a 1 and a 2. The first column already has a 1, so the 2 goes there and the 1 at the end. The bottom row takes the last 3 and 2, and every clue checks out.

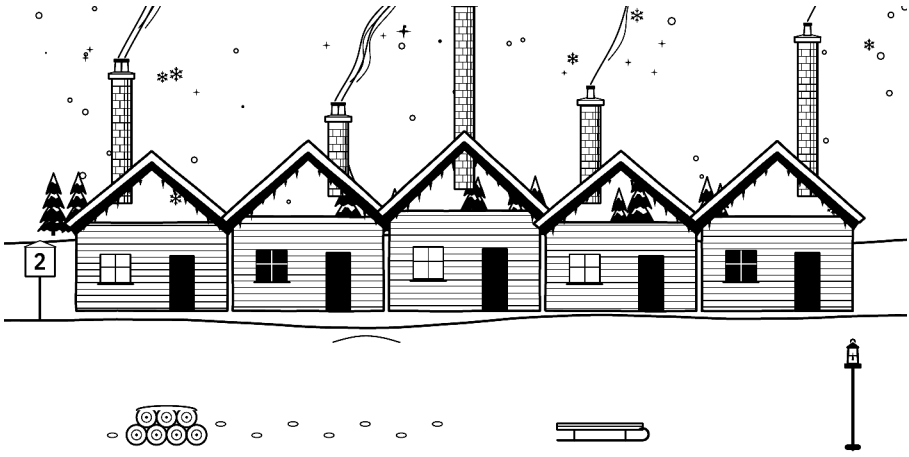

Solutions are at the back of the book.

Part One · Easy · 5×5

The Village Lanes

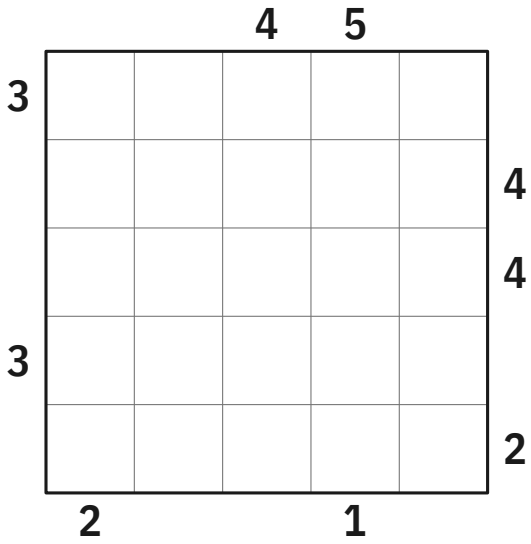

Puzzles 1 to 20

Five-by-five lanes of cottages. Every puzzle can be finished with the edge rules and simple counting: start with the 1s and the 5s, then make sure each row and column has one chimney of every height.

The Lodge Roofs

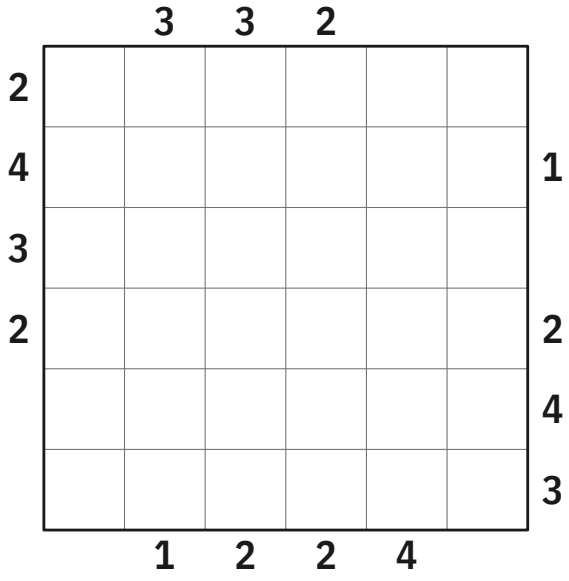

Puzzles 21 to 50

Six-by-six rows of lodge roofs and terraces. The edge rules still help, but now you will need to look at a whole lane at once and ask which orders of chimneys could give the clue at each end.

The Mountain Hamlet

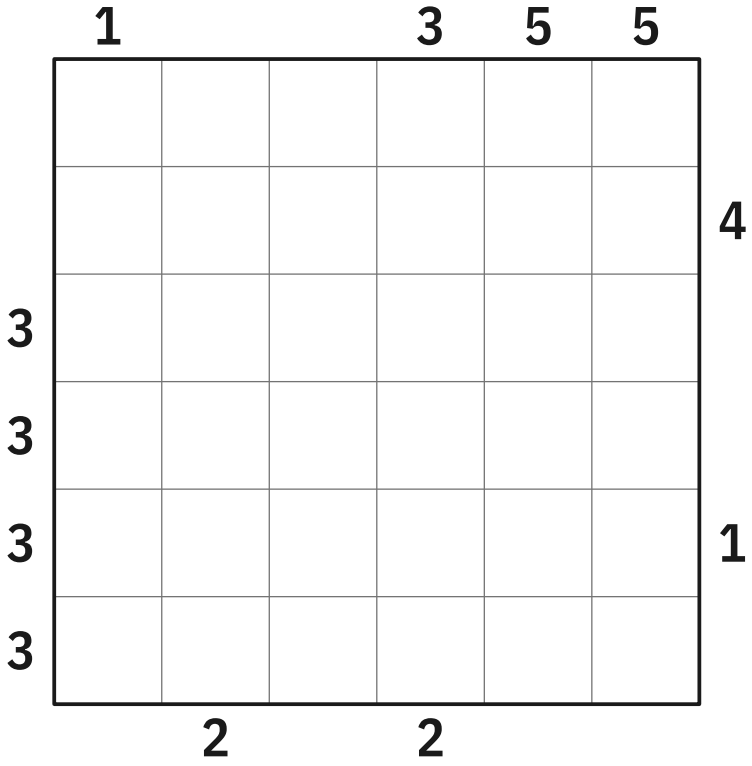

Puzzles 81 to 100

Six-by-six hamlets of huts high on the mountain, with very few clues. Each one needs between one and six careful what-if steps: pencil in a height, follow it until a clue breaks, then rub it out.

THANK YOU FOR WALKING THE ROUNDS

Chimneys of Frostwood

If you enjoyed counting the chimneys of Frostwood, a short review helps other puzzlers find the book. The sweep reads every one, usually by the fire with a mug of cocoa once the last lane is done.

Also by Blake La Pierre

A Frostwood Puzzle Book

The Thief Stayed the Night
A snowbound hotel mystery puzzle book. Twelve cozy elimination cases at the Frostwood Lodge.

Frostwood Express
200 Train Tracks logic puzzles. Lay the railway that climbs from the valley to the lodge.

Stars over Frostwood
180 Star Battle logic puzzles. Chart the winter sky from the village green to the lodge observatory.

Tents in Frostwood
180 Tents and Trees logic puzzles. Pitch camp among the pines, from the lodge meadow to the ridge.

Riddles by the Frostwood Fire
140 cozy winter riddles and text logic puzzles, made for reading on a Kindle.

The Frostwood Sketchbook
140 nonogram picture puzzles. Shade the grids to reveal the sketches in the lodge's winter sketchbook.

Bridges of Frostwood
180 Hashi bridges puzzles. Lay the footbridges across the frozen ponds and the lake of islands.

Fences of Frostwood
100 Slitherlink puzzles. Trace the snowed-under fences from the village lots to the high orchard.

The Lockboxes of Frostwood
120 crack-the-code puzzles. Open the lodge keepers' winter lockboxes, made for reading on a Kindle.
